**DETAILED ACTION**

***Allowable Subject Matter***

Claims 69-136 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art known to the Examiner is listed on the PTO 892 and IDS forms of the previous Office actions. None of the references or combinations thereof disclose or suggest providing a substrate having at least one exposed region of silicon and at least one exposed region of silicon nitride and/or comprising at least one exposed silicon region of one type of conductivity and at least one exposed silicon region of a different type conductivity, delivering, via a linear injector, ozone and TEOS into contact with the substrate and with each other, wherein the delivery of the ozone is pulsed on and off; and reacting the ozone and TEOS in contact with the substrate to selectively deposit silicon oxide onto the substrate as required by the presently claimed invention. Moreover, the terminal disclaimers submitted overcome the obviousness type double patenting rejections of record. Therefore, Claims 69 - 136 are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
